A proud partner of the AmericanJobCenter network

- Increase competitiveness
- Greater employee satisfaction
- Goal oriented workforce
- Low development cost
- More than a "job", it's a career

Apprenticeships are not just for the traditional trades. Now, there are apprenticeship programs for hundreds of occupations across all industries. Employers need skilled workers; young people want a path to a good job without accruing lots of debt. Registered apprenticeship programs lead to greater productivity due to a decrease in employee errors, reduced employee turnover, and improved employee engagement. Apprenticeships may also reduce employers' hiring costs and increase employee loyalty.

Read what this downstate job shop has to say (TerraSource):

We were struggling in the beginning with finding qualified candidates, people that had that fire in their belly...
Barbara Youmans, Human Resources Lead

The primary challenge this solved for our business was it has helped us add direct labor which has been our primary issue.
Brian Heitmann, Plant Manager

The apprenticeship program is a demonstrative commitment to our community, our local economy and our team. It really creates a platform for advocating skilled trades as a vocation, and as an alternative to college even, and helps our local school districts develop interest in skilled trades as a career path.
Jeff Horvath, VP of Operations and Supply Chain

Tax credits, workforce funding, and developmental guidance may be available.
